

NORTH EUROPEAN SOFTWOOD FROM FINLAND

■ THE BEST CHOICE FOR YOUR CONSTRUCTION BUSINESS

■ High quality products crafted from strong Finnish pine and spruce

We source the finest Spruce from the Savo region with a straight trunk, sound knots and a slender structure. Our fine-grained, solid pine has a beautiful structure and small knots and comes from Eastern Finland.

Due to their strength, our products are durable and ideal for use in houses and other structures – like

roofs (max. 6 m), supporting beams for houses, stair components, playground structures, garden structures, car shelters, log cabins, cut products, and door and window frames.

The gluelam beam delivery moisture is below 15%. Therefore, these products are suitable for use either indoors or outdoors. The delivery moisture of planed goods is 16–18%.

■ High quality softwood crafted to your exact specifications

Our flexible production system enables the production of a wide range of different product sizes and lengths to meet the needs of all our different customers.

Our solid North European softwood is cut to the desired length and shape producing specialised components for the construction industry. Using a wide range of processing lines, products are cut, split, planed, glued, and finger-jointed to the exact requirements in our streamlined production sawmill.

Anaika Wood Ltd Oy is a leading Finnish wood processing company. Our products consist of: Gluelam beams 30%, sawn goods 30%, planed goods 40%

Our customers include Japanese and European construction companies, distributors, wholesale businesses, and DIY chains. Most of our products are exported to Japan (60%) and different parts of Europe, North Africa, China and South-East Asia.

We are committed to sourcing high-quality materials and protecting the environment.

The raw material acquisition policy of Anaika Wood Ltd Oy is based on the principles of sustainable forestry. We have achieved the internationally renowned Chain of Custody Certification awarded by the PEFC (Programme for the Endorsement of Forest Certification Systems). This international standard guarantees that our products are an ethical choice originating from sustainably managed forests. This is increasingly important in satisfying public and private procurement requirements.

Our customers can always trust the quality of our products as they are carefully tested and produced in accordance with the current standards. Our own laboratory controls the production process continuously and ensures the high quality of the products. Product control is implemented in accordance with the Japanese JAS standard and the European EN standard.
